

LEAD & COPPER RULE MONITORING AND REPORTING VIOLATION
MANDATORY LANGUAGE - TIER III

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

North Collin Special Utility District has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During [compliance period] we [did not monitor or test – or – did not complete all monitoring or testing] for [contaminant(s)] and therefore cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for [these contaminants], how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples were [or will be] taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were or will be taken
Lead and Copper*				

- **There were no monitoring violations. This was a reporting violation only.**

What is being done?

We are working to correct the problem. For more information, please contact Allen Knight at 972-837-2331 or P. O. Box 343, Melissa, TX 75454.

North Collin Special Utility District will collect samples in the period of June 1, 2017 through September 30, 2017.

This notice is being sent to you by North Collin Special Utility District. Public Water System Number: TX 0430055

Date Distributed: November 30, 2016
